CL203: Database Systems lab

Lab Task 08
Your task is:

Make two pages using php and html

1. **Registeration event page**
   This page allow the user to fill the form and on clicking on submit button the record will get inserted into the table reg_record you have already defined in database nutec

2. **Regestration record page**

Select the searching option (roll no, event name, department), then make a field to enter data accordingly to search and show the results accordingly.

Nutec'20 Event Record

Search by: [drop down that contains option Roll No/Event/Departmnet]

Enter data:[Input field that takes rollno /event/department]

Output

Lets say you chosed roll no , output all the records having that particular roll no
